Environmental, Health and Safety Responsibilities

The responsible and respectful treatment of the environment is a very important aspect of our corporate identity. Environmental as well as health and safety protection are of central significance for PrehKeyTec because they are guaranteeing the health and safety of our employees and our environment. As those issues are at the very heart of our entrepreneurial thinking, they are integrated in all elements of our decision-making-structure as well as its implementation.

Environmental Relief/Protection

We have been monitoring and evaluating our operations on the bases of their ecological impact in the past and will continue to do so in the future. For us environmental laws and regulation are only the minimum standard we try to exceed.

Products and Manufacturing Processes

We try to produce environmentally friendly products. Their manufacturing creates minimal environmental impact and uses as little energy or other resources as possible. That also applies to their disposal. We are of course following all official health, safety and environmental regulations in order to ensure the welfare of our workers as well as the protection of our environment.

Environmental, Health and Safety Management Systems

Our environmental health and safety management systems are in operation at all our sites. They all follow the principles stated above and the objectives resulting out of those principles.

Responsibility Awareness amongst Employees

We try to boost the responsibility awareness of our employees for environmental protection as well as health and safety concerns on all levels. We especially focus on training, informing and motivating our personnel.

Emergency Precautions

In cooperation with the local authorities and our personnel we are constantly improving our emergency preparedness. We take all actions humanly possible to prevent accidents and malfunctions or to at least minimize their effects.

Dialogue

We are permanently in touch with our customers, suppliers, service providers, the authorities and our other partners in order to make sure that we are achieving our goals in health and safety protection. We always follow laws and official regulations concerning us and try to outmatch them.
