

## Garden market Meisenbach | The individual checkout keyboard with fingerprint

### The Challenge

The Meisenbach Garden Center was looking for a programmable keyboard that could easily implement modern and contemporary user management commands at the checkout station. The input solution should be easy and uncomplicated to use in order to enable a short training period for new employees. A simple integration into the existing system of "mb moderne betriebssysteme ag" was also important to the owner of the garden center.

### The Solution

In order to meet these requirements, owner Thomas Meisenbach decided on a programmable keyboard with fingerprint reader from PrehKeyTec. With the built-in capacitive fingerprint reader, the employees of the garden center can identify themselves quickly and clearly. This increases security since no passwords, keys or cards are required that can be forgotten or lost. The change-over to the new system was uncomplicated and quick, as all users data could be captured immediately and in the shortest possible time. With this innovative set up, the Meisenbach garden center is using a future-proof technology.

**“The solution from PrehKeyTec convinced me with the direct integration of the fingerprint sensor into the keyboard. My employees can now register quickly and easily at the checkout.”**

**Thomas Meisenbach, Owner of the Meisenbach Garden Center**

### Contact

The **Meisenbach Garden Center** - more than just flowers and plants! The garden market offers a wide range of everything to do with the garden, animal feed, bee accessories and beverages. Mr. Meisenbach and his wife are at your disposal as contact persons in the family business. The company is located in the rural area of Eitorf in Lindscheid.
