

Ease of use and flexibility on the stage | Programmable keyboard perfects music system

>> The PrehKeyTec keyboard has perfected my new system and it is therefore indispensable for me. <<

The Challenge

Musicians are required to operate the music system fast and precise in live stage operations. That's why the access to titles, playbacks and other data must be reliable and accurate at all times. For this reason, a musician from southern Germany was looking for a fast and dependable control solution for his system. At the same time it was important that the data input was extremely user-friendly. The musician was previously using a remote control with ten number, play and stop buttons. He was no longer satisfied with this method as it restricted the musician too much and commands had to be integrated and called up directly in songs.

The Solution

A colleague made the musician aware of the freely programmable input solutions from PrehKeyTec. With the slim MCI 30 keyboard the musician now has the option of directly accessing the title, text display, DMX and midi control. The MCI 30 keypad is freely programmable and the user can choose between different colors for the keys. New individual functions and commands can be assigned to the keys at any time. The flexible setup and programming makes everyday life much easier for the musician.

“The effort of changing my control has definitely paid off. The PrehKeyTec keyboard has perfected my new system and it is therefore indispensable for me.”

Contact

PrehKeyTec GmbH designs and manufactures intelligent data entry and multi-functional solutions for many demanding applications. This includes customised programmable keyboards and keypads, along with data input devices. These solutions reduce the complexities of inputting data at the point of entry and therefore deliver operational benefits for the customer. All over the world, PrehKeyTec's products are being used, from retail to banking, to industrial and aviation applications. PrehKeyTec GmbH is certified to DIN EN ISO 9001 quality standards, has many years of experience in design and manufacturing, and operates from its own manufacturing plant in Mellrichstadt, Northern Bavaria, offering true “Made in Germany” solutions. <https://www.prehkeytec.com/>
