

Oncology Centrum Gliwice – Flat Surface for more Hygiene

The Challenge

The Centrum Onkologii-Instytutin Gliwice is a medical facility that specialises in treatments for patients suffering with oncological related issues. Due to the importance of the facility and the nature of the illness, the hygienic state of the environment and equipment needs to be maintained via strict disinfecting procedures, which includes the use of specialised disinfecting solutions. The key requirement is to protect the patients at all costs.

The Solution

Thanks to a very precise definition of functional requirements and close co-operation, the Oncology Center's CIO, dr n.fiz. inż. Wojciech Osewski, and the Polish representative of PrehKeyTec, P.U.H HANT in Murowana Goslina, PrehKeyTec's HospiTouch keyboard has been selected as the solution of choice.

Medical staff are now able to maintain high levels of hygiene when inputting important medical data, less time is required to clean the keyboard and the hygienic state of the keyboard can be maintained quickly and efficiently.

"The completely flat hygienic wipe clean surface with integrated mouse and its reliable operation convinced the end user of the benefits of the HospiTouch keyboard."

Andrzej Kurowski, Director of P.U.H Hant

Contact Details

The Oncology Centrum, www.io.gliwice.pl, is one of Poland's leading, highly specialized, modern and well organized clinical and scientific centers. Modern medical equipment and specialized teams provide patients around the country with detection and treatment for oncology related issues, offering world-class standards, using the latest medical techniques and unique alternative therapies. A highly qualified and experienced team of oncologists trained in the most up to date practices, working closely with European and American oncology centers, offer unrevealed medical care through a professional medical team of technicians and oncology nurses.

P.U.H HANT (www.hant.pl) specialises in the selection, sale and technical support of dedicated equipment for medical, retail and industrial applications. They focus on POS solutions, medical data entry solutions, data entry devices and automatic identification using the latest technology. The solutions provided by HANT are tailored to the direct needs of the customer, with products manufactured by the world's leading providers.

PrehKeyTec GmbH designs and manufactures intelligent data entry and multi-functional solutions for many demanding applications. This includes customised programmable keyboards and keypads, along with data input devices. These solutions reduce the complexities of inputting data at the point of entry and therefore deliver operational benefits for the customer. All over the world, PrehKeyTec's products are being used, from retail to banking, to industrial and aviation applications. PrehKeyTec GmbH is certified to DIN EN ISO 9001 quality standards, has many years of experience in design and manufacturing, and operates from its own manufacturing plant in Mellrichstadt, Northern Bavaria, offering true "Made in Germany" solutions.
