

HospiToucH Alphanumeric keyboard with glass surface

Description

HospiToucH is an alphanumeric keyboard with a glass surface for use in medical applications. Special capacitive sensors execute the relevant key codes when the surface is touched. For optimum use, this keyboard is also equipped with an integrated glide pad. The technology used can also be operated when wearing surgical gloves. The surface is resistant to acid, hand perspiration, dust and fluids.

This keyboard has been specifically designed with medical technology in mind, but is also ideal for use in other environments with unfavourable environmental conditions.

Features

- Cleaning function (keys deactivated)
- Acoustic feedback (4 levels of adjustment)
- 18 mm key grid
- Water-resistant
- Wear-resistant lettering
- Sensitivity can be adjusted on 4 levels

Reliability

- High lifetime (no moving parts)
- Protected against low pressure water jets
- Shockproof
- Can be easily cleaned with disinfectant agents

PrehKeyTec GmbH is a leading international manufacturer of high-quality data input systems. Products include modular standard keyboards which are particularly suitable for professional use due to their high level of flexibility and extreme reliability.
